Professional Summary

- 2 years as a Markup Developer in production CMS for a high-traffic publishing platform.
- Shipped workflow improvements that cut content production time by up to 50% and increased layout delivery speed by ~20%.
- Skilled in applications with React, Next.js, TypeScript, and state management libraries.
- Experienced with the full development lifecycle, including testing, CI/CD, and API integration.

Skills

Core: React, Next.js, TypeScript, JavaScript, HTML/CSS/SCSS, Tailwind

State & Data: Redux Toolkit/RTK Query, Zustand, REST

Testing: Vitest/Jest, Playwright

Tooling: Git, GitHub Actions, Vercel

Languages

Russian: Native

English: Professional Working Proficiency (B2)

Serbian: Elementary Proficiency (A1)

Professional Experience

Markup Developer | Junior UI Engineer (CMS & Design Systems)

Tinkoff Journal (Aug 2024 — Present)

Owned the UI publishing pipeline for a high-volume CMS, delivering ~140 articles per month while ensuring cross-browser compatibility and adherence to design system standards.

- Reduced production time for complex articles by up to 50% by creating standardized layout patterns and fixing critical typography edge cases in the auto-formatter.
- Developed a Figma-to-CMS script that automated screenshot processing, saving an estimated 10+ hours of manual work per month for the content team.

Junior Markup Developer at Tinkoff Journal – biggest lifestyle media in Eastern Europe (Aug 2023 — Aug 2024)

Built a library of reusable, regression-tested CMS components that increased layout delivery speed by ~20% and eliminated a recurring class of production bugs.

- Overhauled the Google Docs-to-CMS import process by designing a structured data format, cutting rework from editorial changes by over 50%.
- Created the team's first pre-release checklist and comprehensive onboarding documentation, which cut new hire ramp-up time and significantly reduced deployment-related errors.

Certificates & Professional Development

Advanced TypeScript — Hexlet.io (Nov 2024 — Feb 2025)

Web Developer ~720h — Yandex Practicum (Jan 2023 — Nov 2023)

Responsive Web Design — freeCodeCamp (Jul 2022 — Nov 2022)

Projects

Kanban Board App

Tech Stack: Next.js, React, TypeScript, Redux Toolkit, Firebase, dnd-kit, Vitest

Real-time collaborative Kanban board with authentication, roles, and drag-and-drop interactions.

- Implemented boards/columns/cards CRUD with drag-and-drop and optimistic UI updates, synced via Firestore listeners.
- Added collaboration & security: roles (owner/editor/viewer), email invites, protected operations via Firebase Admin SDK; tests with Vitest (incl. Firestore rules via emulator).

Stripe Mini App

Tech Stack: Next.js, TypeScript, Stripe, Tailwind, shadcn/ui, Zod, Playwright/Vitest

Compact e-commerce demo: live product catalog from Stripe Products/Prices, cart → Checkout → success timeline.

- Implemented Checkout session creation with server-side validation (price IDs, quantity limits) and promotion codes.
- Built verified Stripe webhooks (signature verification) + payment events timeline UI; added SEO basics (OG/canonical/sitemap/robots) and tests (Vitest + Playwright).

Admin Dashboard MVP

Tech Stack: Next.js, React, TypeScript, Redux Toolkit / RTK Query, Tailwind CSS, Charts, i18n

Dashboard-style web app focused on complex UI states (tables, charts, filters) and clean state management.

- Built data-heavy screens (tables/charts/filters) with robust loading/error states and reusable components.
- Implemented API data layer with RTK Query (caching, consistent request handling) and localization (i18n).
