Summary

Frontend developer with a background in production work where quality and deadlines matter. I'm used to collaborating with content and design teams, keeping releases stable, and making processes more predictable. Comfortable owning tasks end-to-end: clarifying requirements, documenting decisions, and shipping reliably. Curious and fast-learning, I ask the right questions, leverage AI-assisted tools to stay efficient and focused on user value.

Skills

HTML | CSS | JavaScript | TypeScript | React | Next.js | MongoDB | Firebase | Stripe API | Tailwind CSS | Git | CI/CD (GitHub Actions) | Vitest | Playwright | AI-assisted tools (Copilot, Cursor, Codex)

Professional Experience

Tinkoff Journal – Part of Tinkoff Group, digital bank ecosystem with 40M+ customers
Frontend Developer (CMS & Web Production) | (Aug 2023 — Jan 2026)

- Shipped and maintained user-facing pages in a CMS-driven production workflow where quality and deadlines matter.
- Worked closely with content and design teams to keep releases stable and layouts consistent across browsers.
- Improved publishing reliability by introducing clear content rules and structured data formats for import (JSON/XML).
- Built reusable HTML/CSS patterns and resolved tricky layout/typography edge cases in production.
- Automated repetitive production tasks with JavaScript and regex (with AI-assisted tooling), reducing manual work and review friction.

Tools: HTML/CSS, JavaScript, Git, JSON/XML, Regex, Cross-browser QA, Automation

Education Certificates

Advanced TypeScript: Hexlet.io (Nov 2024 — Feb 2025)

Web Developer ~720h: Yandex Practicum (Jan 2023 — Nov 2023)

Responsive Web Design: freeCodeCamp (Jul 2022 — Nov 2022)

Languages

Russian: Native

English: Professional Working Proficiency (B2)

Serbian: Elementary Proficiency (A1)

Personal Projects

[Kanban Board](#) | Next.js, React, TypeScript, Redux Toolkit, Firebase, dnd-kit, Vitest
Real-time collaborative Kanban with auth, roles, and drag-and-drop. Leveraged AI-assisted development workflows to accelerate boilerplate code generation and increase delivery of routine changes

[Stripe E-commerce](#) | Next.js, TypeScript, Stripe, Tailwind, shadcn/ui, Zod, Playwright/Vitest
Stripe-powered catalog with cart, and checkout-to-success flow. Validation with Zod and automated tests.

[Admin Dashboard MVP](#) | Next.js, React, TypeScript, RTK Query, Tailwind, Charts, i18n
MVP focused on complex UI states: tables, charts, filters, and i18n. Emphasis on data fetching patterns and reusable UI components.
