Professional Summary

- Frontend Developer (~2 years) building maintainable React/Next.js UIs with TypeScript and Redux. Strong production mindset: component-driven UI, reliability, and clean, testable code. Hands-on REST API integration and state management (Zustand, Redux Toolkit/RTK Query), with a strong focus on QA and testing.
- Built and shipped full-stack demo apps, including an e-commerce flow with Stripe payments/webhooks and a responsive admin dashboard.
- Focused on quality and accessibility foundations, with automated testing using Vitest/Jest, React Testing Library, and Playwright.

Skills

JavaScript | TypeScript | React | Next.js | HTML5 | CSS3 | Tailwind CSS | Zustand | Redux | GraphQL | Node.js | Git | GitHub Actions (CI/CD) | Vercel | Vitest | Jest | Playwright | React Testing Library | MSW

Languages

Russian: Native

English: Professional Working Proficiency (B2)

Serbian: Elementary Proficiency (A1)

Professional Experience

Frontend Developer (CMS & Design Systems)

Tinkoff Journal (Aug 2024 — Present)

- Owned end-to-end publishing in the in-house CMS, shipping ~140 articles/month across formats with consistent QA and on-time releases.

- Reduced longread production time up to 50% by standardizing reusable layout patterns and resolving typography edge cases that bypassed the auto-formatter.
- Built automation and tooling with measurable impact: co-created a Figma script saving ~3 min per screenshot (up to 15–20 per article) and co-developed new CMS snippets to reduce manual markup.

Markup Developer

Tinkoff Journal (Aug 2023 — Aug 2024)

- Engineered a set of reusable, regression-tested components within the in-house CMS, which allowed the team to ship layouts 20% faster while eliminating a class of common production bugs.
- Overhauled the content pipeline from Google Docs to CMS by introducing a structured data format, cutting down rework from last-minute editorial changes by over 50%.
- Created the team's onboarding guide and pre-release checklist for the CMS, reducing ramp-up time for 2 new developers and minimizing deployment blockers.

Certificates & Professional Development

Advanced TypeScript

Hexlet.io (Nov 2024 — Feb 2025)

Web Developer ~ 270h

Yandex Practicum (Jan 2023 — Nov 2023)

Responsive Web Design

freeCodeCamp (Jul 2022 — Nov 2022)

Projects

Stripe Mini App

(Next.js, TypeScript, Stripe, Zustand, RTL/Playwright, Webhooks)

E-commerce flow (catalog → cart → promos → Stripe Checkout). Implemented webhook verification, responsive UI + dark mode, basic SEO. Added unit/UI tests + E2E coverage for checkout scenarios.

Admin Dashboard MVP

(Next.js Router, TS, Tailwind, i18n, Redux / RTK Query, Jest/RTL, MSW, TanStack Table, Chart.js, CI/Codecov)

Admin template with dashboard widgets + users table (sorting/pagination/bulk actions). Server-state via RTK Query (loading/error states, caching), mock REST endpoints + MSW for API mocking. i18n (EN/ES/FR/RU), tests (Jest/RTL) + CI quality gates.
