Hiring Team

Ciklum

Re: Application for Frontend Developer (Job ID 1982)

Dear Hiring Team,

I'm applying for the frontend role listed on your career site (Job ID 1982). I'm based in Novi Sad and open to remote work or hybrid in Novi Sad/Belgrade.

I'm transitioning into a Junior Frontend position after 2+ years of professional markup and CMS work. In that time I learned how to ship clean UI under real constraints: pixel-accurate layouts, reusable components, and fast fixes when something breaks. Now I'm building the same mindset around React and modern tooling.

What I can bring from day one:

- UI delivery you can trust: responsive layouts, consistent spacing and typography, and attention to edge cases.
- Fast, calm debugging: reproduce issues, isolate the cause, fix, and communicate status clearly.
- Confident team communication and strong ownership: I work closely with designers and editors, ask the right questions early, and take responsibility for outcomes.
- A growth mindset: I learn new tools and processes quickly, and I actively seek feedback through code reviews.

My current stack includes React, JavaScript/TypeScript, Next.js (pet projects), HTML/CSS/SCSS, Tailwind, Git/GitHub Actions, Vercel, and basic testing with Vitest/Jest.

I'd love to share examples of my work and discuss how I can contribute at Ciklum. Thank you for your time, and I hope we can speak soon.

Sincerely,
Evgenii Rubin
